

Report to the federal Parliament

Setting and splitting the management costs among social insurance offices

On 22 October 2015, the Belgian House of Representatives voted a resolution entrusting the Court of Audit with two audits within the social insurance sector: one about the management costs reimbursed to social insurance offices and another about their financial accountability. The House of Representatives further asked the Court to carry out a third audit among the Federal government agencies that supervise social insurance offices. The House of Representatives expected the Court's reports respectively in 2016, 2017 and 2018.

The Court has informed the House of Representatives about the first audit results (*Setting and splitting the management costs among social insurance offices*). The report is now available on the Court's website (www.courtofaudit) either in French or Dutch.
